Makes Perfect Blocks Every Time!

Never again will you be frustrated by having your blocks finish too small, using any of the Sew Inspired Design System templates, with their exclusive built-in “Sew Inspired Fudge Factor™”. All blocks are designed to come out slightly larger than needed so you can trim them down with the specially designed Sew Inspired Square-it™ tool. You will always know exactly where to square up your blocks since your seams will always lie on the 3” 6”, or 9” point in a 9” block and at the 2”, 4”, or 6” point of a 6” block. You simply sew and press your blocks, lay your Square-it™ tool over your finished block so that the 3’s & 6”s or the 2’s and 4’s on your Square-it tool line up right on the seams. Now using your rotary cutter, square up your blocks perfectly every time!
